QECP Review Panel
EARTH CONTROL MEASURES(ECM) PLANS AND SERVICES

With the completion of 7 quarterly review sessions, the QECP Review Panel has gained valuable insights on the quality of current QECP's ECM plans and services. The findings at earlier sessions have been shared with the QECPs via circulars and a ECM seminar held on 15 Aug 2013.

The Review Panel, together with the QECP Registry Committee and Erosion Control Sub Committee, met recently to discuss the steps forward to bring about consistently good QECP services and ECM implementation in site. We would like to update you on the below initiatives:

1) *ECMO [Earth Control Measures Officer] Scheme*

PUB will require at least ONE full time site staff to be ECM trained and serve as an ECMO to supervise ECM operation and maintenance as well as conduct regular ECM checks. Details of the scheme are being worked out.

2) *ECM Plan Processing Time*

The ECM plan submission checklist, to facilitate the QECP to get his first submission to PUB right, has been implemented by PUB since Jan 2014.

11 Nov 2014

To further encourage the QECP to get their first time submission right so as to expedite the overall plan processing for the benefit of all QECPs, PUB with the support of the QECP Review Panel will adopt the following processing time frame:

Submission	Processing Time
1st	10 working days
2nd	20 working days
3rd	30 working days

3) Rescindment of ECM Clearance Certificate

PUB may rescind the ECM Clearance Certificate if the QECP failed to turn up for the Review Session without valid reasons AND with the QECP Review Panel finding the first ECM plan submitted by the said QECP to PUB containing basic errors/omissions.

Please feel free to contact Grace Bong [grace@iesnet.org.sg] at 64695000 for clarifications.
